Re: Petition for Rulemaking Filed by EON Corporation. RM-8476

Dear Chairman Hundt:

I am the holder of a license to build an IVDS system in Los Angeles, and I am writing to express my strong support for the above-referenced petition to permit IVDS licensees to offer mobile services. There are a wide variety of exciting new mobile services that IVDS licensees could offer if this petition were granted. These new mobile services will both promote economic expansion and competition in the overall mobile communications market. Thus, a grant of the petition will advance the two policy objectives about which you have spoken and written so forcefully and eloquently -- economic growth and competition.

As an entrepreneur trying to build a viable system that will offer an array of valuable new services to a new customer base, I believe that it is imperative to have the flexibility to offer mobile services. I urge the Commission to approve the petition so that IVDS licensees can use the spectrum for which we are licensed in the highest and best manner, to let the marketplace decide which new interactive services will be viable.

Respectfully submitted,

  
Alberto E. Garsa
